

Education

Rochester Institute of Technology
Bachelors with honors, Computer Science

Rochester, NY
May 2025

Experience

Precision Optical Technologies
Software Engineering Co-op

Rochester, NY
January 2024 – August 2024

- Designed a Gitlab synchronized web interface that improved our engineers project, and issue tracking by replacing an outdated excel spreadsheet.
- Maintained legacy software such as Electron, QT, and React based applications that accounted for a majority of company revenue.
- Managed the internal Django framework, improving on old features while adding new ones to support other parts of the company like sales, HR, production, and engineering.

MKS Instruments
Software Engineering Co-op

Rochester, NY
January 2023 – July 2023

- Developed a Jenkins build automation script that greatly streamlined the ability to ship software.
- Enhanced main Dynamic Link Library by adding to the test suit, fixing reported bugs, and adding requested features.

MIMIO
App Developer

Remote
July 2022 – December 2022

- Collaborated with the client to develop a unique messaging app that was shipped to Google Play Store and Apple App Store.
- Delivered timely Graphical User Interface updates to the client throughout development.
- Built backend components of the App including, Firebase database, user login flow, and a custom message interpretation engine.

Projects

Homelab Server Management

Docker, Cloudflare, Proxmox, Linux

- Assembled a custom built server running Proxmox
- Manage multiple Docker containers for self hosted services that route through cloudflare to be exposed to the internet

Porthole

QML, Bash, Linux, Python, UI Design

- Maintain a set of repositories that together make up Porthole, a customized Arch Linux distribution.
- Assembled a set of Bash scripts that automatically install packages and setup dot files to build the distro.
- Devised a Quickshell widget that makes up the desktop environment along with Hyprland
- Created a QT application that allows for customizing and configuring the distribution.

Personal Website

NextJS, Typescript, HTML, CSS

- Compiled relevant personal information into a single, easily navigable location.
- Designed in such a way that the site is built from a single data.json file so information on pages like about, projects, experience, and skills can be easily changed whenever needed.

Technical Skills

Programming: Python, Java, C#, JS, TS, HTML, CSS, VB, C, Dart, SQL

Frameworks/Tools: Django, Git, API, PostgreSQL, MySQL, Unit Testing, Perforce, troubleshooting virtual machines, .NET, Firebase, Next.js, React, Flutter

DevOps/Infrastructure: Port management, Docker, hardware assembly, network tunneling, Cloudflare

Operating Systems: Windows, Windows Server, MacOS, Linux(Ubuntu server and Arch), Proxmox, TrueNAS

Other: Adaptability, Communication, Organization
